

MISSION STATEMENT

North American Power Kiter's Association (NAPKA) is a non-profit organization run by power kites from across North America. Our mission is to develop and promote the following types of wind powered traction kiting: Kite Buggies, All Terrain Boards (aka Landboards), Dirt Surfers, and Kite Skates. Our intention is to work with the public to educate them in these activities and to teach our member pilots how to participate in this sport in a manner that is safe both for the public and them. In addition, we intend to work with local and state authorities to develop and maintain access to areas in North America for power kiting activities. We intend to grow the sport and improve safety by offering knowledge and guidance through instruction by NAPKA members at NAPKA sanctioned events across North America.

ASSOCIATION GOALS AND OBJECTIVES

NAPKA's goals and objectives are to improve the safety of power kiting and grow the sport by instructing interested people at NAPKA sanctioned events in the sport and the proper handling of equipment.

Additional objectives are to educate the public, land owners and state and local authorities about NAPKA's purpose, guidelines and safety practices.
